SUMMARY

Passionate and results-driven Frontend & WordPress Developer with over 2 years of professional experience, currently working as a Junior Frontend Developer at Startise Ltd. Experienced in building high-performance, responsive websites using WordPress, Elementor, Gutenberg, HTML, CSS, and JavaScript. Successfully delivered 90+ client projects while maintaining strong attention to quality, performance, and user experience. Skilled in custom WordPress development, plugin integration, performance optimization, and modern frontend practices. I also leverage AI-assisted vibe coding to accelerate development and have successfully published a WordPress plugin on WordPress.org, demonstrating my commitment to creating practical solutions and continuously expanding my technical expertise.

TECHNICAL SKILLS

WordPress (Elementor)
HTML 5
CSS 3
JavaScript
Tailwind CSS
Bootstrap5
AI

PROFESSIONAL EXPERIENCE

Startise Ltd. (Templately) (Jr. Frontend Developer) **Jan 2026 - Present**

- Develop responsive website templates using WordPress, Elementor, and Gutenberg.
- Convert Figma designs into clean, pixel-perfect, and reusable templates.
- Ensure responsive layouts, performance, and cross-browser compatibility.
- Collaborate with the product team to deliver high-quality templates for the Templately library.

SM Technology (WordPress Developer) **Oct 2024 - Nov 2025**

- Built custom WordPress websites using Elementor, ensuring responsive design and user-friendly interfaces.
- Designed landing pages with Elementor Pro to boost engagement and conversion rates.
- Customized WordPress themes to meet client-specific branding and functional needs.
- Integrated essential plugins for SEO, speed, forms, and e-commerce functionality.
- Used HTML, CSS, and JavaScript basics to customize Elementor elements as needed.

bdCalling Academy (Internship as WordPress Developer) **July 2024 - Oct 2024**

- Completed a professional WordPress Development course at BdCalling Academy.
- Gained hands-on training in Elementor, theme customization, and plugin integration.
- Built real-world projects under expert guidance during the course.

EDUCATION

Diploma in Computer Science and Technology **2020 - 2024**

Kushtia Polytechnic Institute

Portfolio

ParkXpot – Smart Parking Marketplace
Tech Stack: Next.js, React, Tailwind CSS, Leaflet Maps
Built using AI-assisted development, ParkXpot is a modern parking marketplace that enables users to discover, book, and manage parking spaces through an interactive map with a responsive and intuitive user experience.
Live Demo: https://park-xpot.vercel.app/

Tukify – AI Shopping Assistant for WooCommerce
Tech Stack: WordPress, PHP, JavaScript, WooCommerce, AI APIs
Developed and published a WordPress.org plugin that provides AI-powered shopping assistance, product recommendations, and an enhanced shopping experience for WooCommerce stores.
Plugin: https://wordpress.org/plugins/tukify/
